SUBJECT INDEX

Hearing

ACOUSTIC-IMMITTANCE MEASURES

Aural acoustic-immittance measurement: Inter-aural differences. Richard H. Wilson, Janet E. Shanks & Theresa M. Welde. November, 413-421.
The relationship between magnitude of hearing loss and acoustic reflex threshold levels. Shlomo Silman & Stanley Gelfand. August, 312-316.

AUDITORY/OTIC PATHOLOGIES

A response to Wiley and Lilly. Shlomo Silman, Stanley A. Gelfand, John Lutolf, & Tong H. Chun. May, 217.
Auditory perceptual impairments in children with specific language disorders: A review of the literature. Mary Lubert. February, 3-9.
Characteristics of hearing-impaired children in the public schools: Part I demographic data. Neil T. Shepard, Julia M. Davis, Michael P. Gorga, & Patricia G. Stelchowicz. May, 123-129.
Characteristics of hearing-impaired children in the public schools: Part II psychoeducational data. Julia M. Davis, Neil T. Shepard, Patricia G. Stelmachowicz, & Michael P. Gorga. May, 130-137.

HABILITATION, REHABILITATION, EDUCATION

A case study of vocal volume reduction. Jodi Mallory Lodge, & Gary Dean Yarnall. August, 317-320.
Characteristics of hearing-impaired children in the public schools: Part I demographic data, Neil T. Shepard, Julia M. Davis, Michael P. Gorga & Patricia G. Stelmachowicz. May 123-129.
Characteristics of hearing-impaired children in the public schools: Part II psychoeducational data. Julia M. Davis, Neil T. Shepard, Patricia G. Stelmachowicz & Michael P. Gorga. May, 130-137
Caution ... peanuts may be harmful to your clients' health! Anne H. B. Putnam. May, 220-221.
Electromyographic feedback treatment for tinnitus auriam. Thomas E. Bordon, Walter H. Moore & Sandra R. Clark. February, 39-45.
Perception on iconicity in American Sign Language by hearing and deaf subjects. Penny L. Griffith, Jacques H. Robinson, & John M. Panagos, November, 388-397.
Response to Freeman, Sinclair and Riggs. M. C. Martin. May, 224.

HEARING AIDS, AUDITORY PROSTHESES

Earmold options for widespread hearing aids. Mead C. Killion. February, 10-20.
Progressive hearing loss in children: Hearing aids and other factors. Katherine Reilly, Elmer Owens, Dennis Uken, Adeline Clingal McClathchie, & Ronnie Clarke. August, 328-334.
Reply to M. C. Martin. Barry A. Freeman, Stephen J. Sinclair, & Donald E. Riggs. May, 224.

HEARING LOSS AND DEAFNESS

A response to Wiley and Lilly. Shlomo Silman, Stanley A. Gelfand, John Lutoff, & Tong A. Chun. May, 217.

Auditory processing in aging listeners. Lynne Marshall. August, 226-240.

Characteristics of hearing-impaired children in the public schools: Part I: demographic data. Neil T. Shepard, Julia M. Davis, Michael P. Gorga, & Patricia G. Stelmachowicz, May, 123-129.

Characteristics of hearing-impaired children in the public schools: Part II: psychoeducational data. Julia M. Davis, Neil T. Shepard, Patricia G. Stelmachowicz, & Michael P. Gorga.

Determining the pure tone frequencies to be used in identification audiometry. David Katt & Homer Sprague. November, 433-436.

Longitudinal observations of individual infant's vocalizations. Ann Stash Maskarinec, George F. Cairns, Earl C. Butterfield, & L. K. Weramer. August, 267-273.

Progressive hearing loss in children: Hearing aids and other factors. Katherine Reilly, Elmer Owens, Dennis Uken, Adeline Clingal McClathchie, & Ronnie Clarke. August 328-334.

Response to Freeman, Sinclair and Riggs. M. C. Martin. May, 224.

Response to Shapiro. Karen Turnbaugh. August, 336.

The relationship between magnitude of hearing loss and acoustic reflex threshold levels. Shlomo Silman & Stanley A. Gelfand. August, 312-316.

DIAGNOSTIC AUDIOMETRY

A response to Wiley and Lilly. Shlomo Silman, Stanley A. Gelfand, John Lutolf, & Tong H. Chun. May, 217.

Reflex Modulation: A hearing test for the difficult-to-test. Levi Reiter, Cornelius P. Goetzinger, & Steven E. Press. August, 262-266.

The effect of word list and talker variation on word recognition scores using time-altered speech. Albert De Chicchis, Daniel J. Orchik, & John Tecca. May, 213-216.

The relationship between magnitude of hearing loss and acoustic reflex threshold levels. Shlomo Silman & Stanley A. Gelfand. August, 312-316.

PSYCHOACOUSTICS

Ipsilateral audiotory pathway suppression in dichotic CV speech perception: Evidence from error analysis. Malcolm R. McNeil, John M. Pettit, & Wayne O. Olsen. February, 87-90.

Reply to Turnbaugh. Irving Shapiro. August, 336.

SIGN LANGUAGE

Perception of iconicity in American Sign Language by hearing and deaf subjects. Penny L. Griffith, Jacques. H. Robinson, & John M. Panagos. November, 388-397.

Language

APHASIA, AGNOSIA, APRAXIA

Analysis and remediation of aphasia in the U.S.S.R. The contribution of A. R. Luria, Frances M. Hatfield. November, 338-347.

Facilitating the comprehension of tense related sentences in aphasia. Robert S. Pierce. November, 364-368.

Identifying behavior associated with verbal self-corrections of aphasic clients. Robert C. Marshall & Connie A. Tompkins. May, 168-173.

Markedness of features in the articulatory substitutions of children. Margaret Stutts Toombs, Sadanand Singh, & Mary Ellen Hayden. May 184-191.

Pitres neurological model of language mechanism in polyglot aphasics. Kurt Kratschmer. February, 110-112.

Response of an agrammatic patient to a syntax stimulation program for aphasia. Nancy Helm-Estabrooks, Patricia M. Fitzpatrick & Barbara Barresi. November, 422-427.

The role of distinctive features in articulation errors. Sadanand Singh, Mary Ellen Hayden, & Margaret Toombs. May, 174-183.

ASSESSMENT

Identifying behavior associated with verbal self-corrections of aphasic clients. Robert C. Marshall & Connie A. Tompkins. May, 168-173.

Interpreting results obtained from Carrow's TACL. Kenneth G. Shipley. May, 222-223.

Language evaluation: Science or art? Doris V. Allen, Lynn S. Bliss, & Jack Timmons, February, 66-68.

Reply to Bountress and Richards. Joan Cassandra Payne & Robert Jay Williams, Jr. November, 437-439.

Response to Gandour. Madeline Brand. May, 218-220.

The effect of context on verbal elicited imitation. Mary Hale Haniff & Gerald M. Siegel. February 27-30.

The middle ground in evaluating language programs. Patricia A. Prelock & John M. Panagos. November, 436-437.

The role of distinctive features in articulation errors. Sadanand Singh, Mary Ellen Hayden, & Margaret Stutts Toombs. May, 174-183.

Treatment of phonological disability using the method of meaningful minimal contrast: Two case studies. Frederick F. Weiner. February, 97-103

COMMUNICATION OF AGED

Perception of spoken communication by elderly chronically ill patients in an institutional setting. Rosemary Lubinski, Eleanor B. Morrison, & Seymour Rigrodski. November, 388-397.

LANGUAGE DISABILITIES IN CHILDREN

A comparative study of pre-meaningful vocalizations produced by normally developing and Down's syndrome infants. Bruce L. Smith & Oller D. Kimbrough. February, 46-51.

A study of the voicing distinction associated with omitted word-final stops. Gary Weismer. August, 320-328.

Characteristics of hearing-impaired children in the public schools Part I demographic data. Neil T. Shepard, Julia M. Davis, Michael P. Gorga, & Patricia Stelmachowicz. May, 123-129.

Characteristics of hearing-impaired children in the public schools Part II psychoeducational data. Julia M. Davis, Neil T. Shepard, Patricia G. Stelmachoneicz, & Michael P. Gorga. May, 130-137.

Interpreting results obtained from Carrow's TACL. Kenneth G. Shipley. May, 222-223.

Longitudinal observations of individual infant's vocalizations. Ann Stash Maskarinec, George F. Cairns, Jr., Earl C. Butterfield, & L. K. Weamer. August, 267-273.

Markedness of features in the articulatory substitutions of children. Margaret Stutts Toombs, Sadanand Singh & Mary Ellen Hayden. May, 184-191.

Perception of iconicity in American Sign Language by hearing and deaf subject. Penny L. Griffith, Jacques H. Robinson, & John M. Panagos. November, 388-397.

Selection of children with specific language deficits. Rachel E. Stark, & Paula Tallal. May, 114-122.

Speech style modifications of language-impaired children. Marc E. Fey, Laurence B. Leonard, & Kim A. Wilcox. February, 91-96.

Systematic sound preference as a characteristic of phonological disability. Frederick F. Weiner. August, 281-286.

LANGUAGE DISABILITIES IN CHILDREN

Transfer of verbal responses across instructional settings by autistic-type children. Jan Sheldon Handleman. February, 69-76.

Treatment of phonological disability using the method of meaningful minimal contrast. Two case studies. Frederick F. Weiner. February, 97-103.

MENTAL RETARDATION

A case study of vocal volume reduction. Jodi Mallory Lodge & Gary Dean Yarnall. August, 317-320.

A comparative study of pre-meaningful vocalizations produced by normally developing and Down's syndrome infants. Bruce L. Smith & Oller D. Kimbrough. February, 46-51.

Language training: Some data on response classes and generalization to an occupational setting. M. N. Hedge & Joann McConn. November, 353-358.

Perception of iconicity in American Sign Language by hearing and deaf subject. Penny L. Griffith, Jacques H. Robinson & John M. Panagos. November, 388-397.

NORMAL LANGUAGE DEVELOPMENT

Auditory perceptual impairments in children with specific language disorders: A review of the literature. Mary Lubert. February, 3-9.

Black English and standard American English contrasts in consonantal development of four- and five-year-old children. Harry N. Seymour & Charlena M. Seymour. August, 274-280.

Learning words using traditional orthography and the symbols of Rebus, Bliss and Carrier. May, 191-196.

The cry characteristics of an infant who died of the sudden infant death syndrome. R. H. Colton, & A. Steinschneider. November, 359-363.

TREATMENT

Caution ... peanuts may be harmful to your clients' health! Anne H. B. Putnam. May, 220-221.

Language training: Some data on response classes and generalization to an occupational setting. M. N. Hedge & Joann McConn. November, 353-358.

Markedness of features in the articulatory substitutions of children. Margaret Shutts Toombs, Sadanand Singh, & Mary Ellen Hayden. May, 184-191

The role of distinctive features in articulation errors. Sadanand Singh, Mary Ellen Hayden & Margaret Stutts Toombs. May, 174-183

Transfer of verbal responses across instructional settings by autistic-type children. Jan Sheldon Handleman. February, 69-76.

Speech

ARTICULATION OR PHONOLOGICAL DISORDERS

A comparative study of pre-meaningful vocalizations produced by normally developing and Down's syndrome infant! Bruce L. Smith & Oller D. Kimbrough. February, 46-51.

A minimal-work-pair model for teaching the linguistic significance of distinctive feature properties. Stephen E. Blache, Carl L. Parsons & Jean M. Humphreys. August, 291-296.

An investigation of the efficacy of oral myofunctional therapy as a precursor to articulation therapy for pre-first grade children. Margaret Christensen, & Marvin Hanson. May, 160-167.

A response to Gandour. Peter C. Bjarkman & Hugh W. Buckingham. May, 220.

Articulation therapy using distinctive feature analysis to structure the training program: Two case studies. Kenneth F. Ruder. February, 59-65.

Black English and standard English contrasts in consonantal development of four- and five-year old children. Harry N. Seymour & Charlena M. Seymour. August, 274-280.

Canon Communicator use by adults: A retrospective study. David R. Benkelman, Katherine M. Yorkson, Sandra C. Gorhoff, Patricia M. Mitsaday, & V. Talley Kenyon, November, 374-378.

Caution ... peanuts may be harmful to your clients' health! Anne H. B. Putnam. May, 220-221.

Markedness of features in the articulatory substitutions of children. Margaret Stutts Toombs, Sadanand Singh, & Mary Ellen Hayden. May, 184-191.

Phonological Processes which characterize unintelligible and intelligible speech in early childhood. Barbara Williams Hudson & Elaine Pagel Paden. November, 369-373.

Response to Gandour. Madeline Bland. May, 218-220.

Systematic sound preference as a characteristic of phonological disability. Frederick F. Weiner. August, 281-286.

Treatment of phonological disability using the method of meaningful minimal contrast: Two case studies. Frederick F. Weiner. February, 97-103.

ASSESSMENT

A clinical method for estimating laryngeal airway resistance during vowel production. Judith R. Smitheran, & Thomas J. Nixon. May, 138-146.

Criteria for phonological process analysis, Leija V. McReynolds & Mary Elbert. May, 197-204.

Black English and standard American English Contrasts in consonantal development of four- and five-year-old children. Harry N. Seymour & Charlena M. Seymour. August, 274-280.

Caution ... peanuts may be harmful to your clients' health! Anne H. B. Putnam. May, 220-221.

Identifying behavior associated with verbal self-corrections of aphasic clients. Robert C. Marshall & Connie A. Tompkins. May, 168-173.

Interpreting results obtained from Cannon's TACL. Kenneth G. Shipley. May, 222-223.

Palilalia: A descriptive study of pathological reiterative utterances. Leonard L. LaPointe & Jennifer Horner. February, 34-38.

Regression to the mean in pretreatment measures of stuttering. Gavin Andrews & Robin Harvey. May, 204-207.

Reply to Bountress and Richards. Joan Cassandra Payne & Robert Jay Williams, Jr. November, 437-439.

Tennessee test of rhythm and intonation patterns. Kazunari J. Koike & Carl W. Asp. February, 81-86.

The speech specitrographic display: Interpretation of visual patterns by hearing-impaired adults. Jean E. Maki; Marianne Streff Gustafson, John M. Conklin & Brenda K. Humphrey-Whitehead, November, 379-387.

The S/Z ratio as an indicator of laryngeal pathology. Frances C. Eckel & Daniel R. Boone. May, 147-149.

Treatment of phonological disability using the method of meaningful minimal contrast: Two case studies. Frederick F. Weiner. February, 97-103.

CRANIOFACIAL ANOMALIES, VOCAL TRACT DISABILITIES

Caution ... peanuts may be harmful to your clients' health! May, 220-221.

NEUROLOGICAL DISABILITIES

Ataxia dyparthia: Treatment sequences based on intelligibility and prosodic considerations. Kathryn M. Yorkston & David R. Benkelman. November, 398-404.

Communication efficiency of dyparthric speakers as measured by sentence intelligibility and speaking rate. Kathryn M. Yorkston & David R. Benkelman. August, 296-301.

Identifying behavior associated with verbal self-corrections of aphasic clients. Robert C. Marshall & Connie A. Tomkins. May, 168-173.
Long-term effects on speech of chronic cerebellar stimulation in cerebral palsy. Virginia L. Wolfe, David L. Ratusnik & Richard D. Penn. August, 286-290.
Markedness of features in the articulatory substitutions of children. Margaret Stutts Tombs, Sadanand Singh & Mary Ellen Harden. May, 184-191.
Palilalia: A descriptive study of pathological reinterative utterances. Leonard L. LaPointe & Jennifer Horner. February, 34-38.
Vocal tract control in Parkinson's disease: Phonetic feature analysis in misarticulations. Jeri A. Logeman & Hilda B. Fisher. November, 348-352.

SPEECH OR VOICE PRODUCTION

A clinical method for estimating laryngeal airway resistance during vowel production. Judith B. Smitheran & Thomas S. Nixon. May, 138-146.
Psychological considerations in vocal rehabilitation. Friedrich S. Brodnite. February, 21-26.
The cry characteristics of an infant who dies of the sudden infant death syndrome. R. H. Colton & A. Steinschneider. November, 359-363.

SPEECH PERCEPTION, AUDITORY PROCESSING

Markedness of features in the articulatory substitutions of children. Margaret Stutts Toombs, Sadanand Singh, & Mary Ellen Hayden. May, 184-191.
The effects of early middle ear pathology on auditory perception and academic achievement. Pauline J. Brandes & Diane M. Ehinger. August, 301-307.
The role of distinctive features in articulation errors. Sadanand Singh, Mary Ellen Hayden & Margaret Toombs, May, 174-183.

STUTTERING, OTHER FLUENCY DISORDERS

A correction to "Response to Ingham's Critique." Barry E. Guitar. November, 440.
A reanalysis of "Stuttering Therapy: The relation between attitude change and long-term outcome." Martin A. Young. May, 221-222.
Latency of vocalization onset of stutterers and nonstutterers under conditions of auditory and visual cueing. Stephen C. McFarlane & Kenneth G. Shipley. August, 307-312.
Palilalia: A descriptive study of pathological reiterative utterances. Leonard L. LaPointe & Jennifer Horner, February, 34-38.
Regression to the mean in pretreatment measures of stuttering. Gavin Andrews & Robin Harvey. May, 204-207.
Reply to Weiner. J. G. Andrews, August, 335.
Response to Andrews, Guitar, and Howie. Adeline Weiner. August, 335.
Short- and long-term outcome in an intensive treatment program for adult stutterers. Pauline M. Howie, Susan Tanner, & Gavin Andrews. February, 104-109.

TREATMENT

A case study of vocal volume. Jodi Mallory Lodge & Gary Dean Yarnall. August, 317-320.
A clinical method for estimating laryngeal airway resistance during vowel production. Judith R. Smitheran, & Thomas J. Hixon. May, 138-146.
Articulation therapy using distinctive feature analysis to structure the training program: Two case studies. Kenneth F. Buder & Betty A. Bruce. February, 59-65.
Caution ... peanuts may be harmful to your clients' health! Anne H. B. Putnam. May, 220-221.
Criteria for phonological disorders. Leija V. McReynolds & Mary Elbert. May, 197-204.
Long-term effects on speech of chronic cerebellar stimulation in cerebral palsy. Virginia I. Wolfe, David L. Ratusnik, & Richard D. Penn. August, 286-290.
The role of distinctive features in articulation errors. Sadanand Singh, Mary Ellen Hayden & Margaret Stutts Toombs. May, 174-183.
The speech specitrographic display: Interpretation of visual patterns by hearing-impaired adults. Jean E. Maki, Marianne Streff Gustafson, John M. Conklin, & Brenda K. Humphrey-Whitehead. November, 379-387.

VOICE DISORDERS, LARYNGEAL DISABILITIES

A clinical method for estimating laryngeal airway resistance during vowel production. Judith R. Smitheran & Thomas J. Hixon. May, 138-146.
Adductor spactic Dysphonia as a sign of essential (voice) tremor. Arnold E. Aronson & David E. Hartman. February, 52-58.
Caution ... peanuts may be harmful to your clients' health! Anne H. B. Putnam. May, 220-221.
Clinical investigations of intermittent breathy dysphonia. David E. Hartman & Arnold E. Aronson, November, 428-432.
Individual speaker influence of relative intelligibility of esophageal speech and artificial larynx speech. Marti Butell Kalb & Mary A. Carpenter. February, 77-80.
The S/Z ratio as an indicator of laryngeal pathology. Frances C. Eckel & Daniel R. Boone. May, 147-149.

Professional and General Scientific Issues

EDUCATION, CONTINUING EDUCATION

A comparison of experimental and observational approached for enhancing the interpersonal communication skills of speech-language pathology students. Deborah R. Klevans, Helen B. Volz, & Robert M. Friedman. May, 208-213.
Response to Freeman, Sinclair and Riggs. M. C. Martin. May, 224.
Response to Gandour. Barbara B. Dreher. May, 217-218.

ETHICS AND STANDARDS

Caution ... peanuts may be harmful to your clients' health! Anne H. B. Putnam. May, 220-221.
Response to Freeman, Sinclair and Riggs. M. C. Martin. May, 224.

RESEARCH ISSUES AND METHODOLOGY

A case study of vocal volume reduction, Jodi Mallory & Gary Dean Yarnall. August, 317-320.
A clinical method for estimating laryngeal airway resistance during vowel production. Judith R. Smitheran & James J. Hixon. May, 138-146.
A reply to Payne and Williams. Nicholas Bountress. August, 335.
Longitudinal observations of individual infant's vocalizations. Ann Stash Maskarinec, George F. Cairns, Dr., Earl C. Butterfield & L. K. Weamer. August, 267-273.
Regression to the mean in pretreatment measures of stuttering. Gavin Andrews & Robin Harvey. May, 204-207.
Response to Freeman, Sinclair and Riggs. M. C. Martin. May, 224.
The speech specitrographic display: Interpretation of visual patterns by hearing-impaired adults. Jean E. Maki, Marianne Streff Gustafson, John M. Conklin, & Brenda K. Humphrey-Whitehead. November, 379-387.

TITLE INDEX

A case study of vocal volume reduction. Jodi Mallory Lodge, & Gary Dean Yarnall. August, 317-320.

A clinical method for estimating laryngeal airway resistance during vowel production. Judith R. Smitheran & Thomas J. Hixon. May, 138-146.

A comparative study of pre-meaningful vocalizations produced by normally developing and Down's syndrome infants. Bruce L. Smith & Kimbrough Oller. February, 46-51.

A comparison of experimental and observational approaches for enhancing the interpersonal communication skills of speech-language pathology students. Deborah R. Klevans, Helen B. Volz, & Robert M. Friedman. May, 208-213.

A correction to response to Ingham's critique. Barry E. Guitar. November, 440.

Adductor spastic dysphonia as a sign of essential (voice) tremor. Arnold E. Aronson & David E. Hartman. February, 52-58.

A minimal-work-pair model for teaching the linguistic significance of distinctive feature properties. Stephen E. Blanche, Carl L. Parsons, & Jean M. Humphreys. August, 291-296.

Analysis and remediation of aphasia in the U.S.S.R.; The contribution of A. R. Luria. Frances M. Hatfield, November, 348-352.

An investigation of the efficacy of oral myofunctional therapy as a precursor to articulation therapy for pre-first grade children. Margaret Christensen & Marvin Hanson. May, 160-167.

A reanalysis of "Stuttering therapy: The relationship between attitude change and long-term outcome." Martin A. Young. May, 221-222.

A reply to Payne and Williams. Nicholas Bountress. August, 335.

A reply to Weiner. J. G. Andrews, B. E. Guitar, & P. M. Howie. August, 335.

A response to Gandour. Peter C. Bjarkman & Hugh W. Buckingham. May, 220.

A response to Wiley and Lilly, Shlomo Silman, Stanley A. Gelfand. John Lutolf, & Tong H. Chun, May, 217.

Articulation therapy using distinctive feature analysis to structure the training program: Two case studies. Kenneth F. Ruder & Betty H. Bruce. February, 59-65.

A study of the voicing distinction associated with omitted, word-final stops. Gary Weismer, Daniel Dinnsen, & Mary Elbert. August, 320-328.

Ataxic dysarthia: Treatment sequences based on intelligibility and prosodic considerations. Kathryn M. Yorkston & David E. Beukelman. November, 398-404.

Auditory perceptual impairments in children with specific language disorders: A review of the literature. Mary Lubert. February, 3-9.

Auditory processing in aging listeners. Lynne Marshall. August, 226-240.

Aural acoustic-immittance measurements: Inter-aural differences. Richard H. Wilson, Janet E. Shanks, & Therese M. Velde. November, 413-421.

Black English and standard American English contrasts in consonantal development of four- and five-year-old children. Harry N. Seymour, & Charlena M. Seymour. August, 274-280.

Canon communicator use by adults: A retrospective study. David R. Beukelman, Katherine M. Yorkston, Sandra C. Gorhoff, Patricia M. Mitsundya, & V. Talley Kenyon. November, 374-378.

Caution ... peanuts may be harmful to your client's health! Anne H. B. Putnam. May, 220-221.

Characteristics of hearing-impaired children in the public schools: Part I demographic data. Neil T. Shepard, Julia M. Davis, Michael P. Gorga & Stelmachowicz. May, 123-129.

Characteristics of hearing-impaired children in the public schools: Part II psychoeducational data. Julia M. Davis, Neil T. Shepard, Patricia G. Stelmachowiez, & Michael P. Gorga. May, 130-137.

Clinical investigations of intermittent breathy dysphonia. David E. Hartman & Arnold E. Aronson. November, 428-432.

Communication efficiency of dysarthric speakers as measured by sentence intelligibility and speaking rate. Kathryn M. Yorkston, & David R. Beukelman. August, 296-301.

Criteria for phonological process analysis. Leija V. McReynolds & Mary Elbert. May, 197-204.

Determining the pure tone frequencies to be used in identification audiometry. David Katt & Homer Sprague. November, 433-436.

Discourse devices used by language disordered children; A preliminary investigation. Anne Van Kleeck, & Terri Lee Frankel. August, 250-257.

Earmold options for wideband hearing aids. Mead C. Killion. February, 10-20.

Electromyographic feedback treatment for tinnitus aurium. Thomas E. Borton, Walter H. Moore, & Sandra R. Clark, February, 39-45.

Facilitating the comprehension of tense related sentences in aphasia. Robert S. Pierce. November, 364-368.

Identifying behavior associated with verbal self-corrections of aphasic clients. Robert C. Marshall & Connie A. Tompkins. May, 168-173.

Importance of an eye examination in identifying the cause of congenital hearing impairment. Catherine W. Campbell, Robert C. Polomeno, John M. Elder, Jane Murray & Anne Altosaar. August, 258-261.

Individual speaker influence of relative intelligibility of esophageal speech and artificial larynx speech. Marti Butnell Kalb & Mary A. Carpenter. February, 77-80.

Interpreting results obtained from Carrow's TACL. Kenneth G. Shipley. May, 222-223.

Ipsilateral auditory pathway suppression in dichotic CV speech perception: Evidence from error analysis. Malcolm R. McNeil, John M. Pettit & Wayne O. Olsen. February, 87-90.

Language evaluation: Science or art? Doris V. Allen, Lynn S. Bliss, & Jack Timmons. February, 66-88.

Language training: Some data on response classes and generalization to an occupational setting. M. N. Hedge & Joann McConn. November, 353-358.

Latency of vocalization onset for stutterers and nonstutterers under conditions of auditory and visual cueing. Stephen C. McFarlane & Kenneth G. Shipley. August, 307-312.

Learning words using traditional orthography and the symbols of Rebus, Bliss, and Carrier. Charlotte R. Clark. May, 191-196.

Longitudinal observations of individual infant's vocalizations. Ann Stash Maskarinec, George F. Cairns, Jr., Carl C. Butterfield & L. K. Weamer. August, 267-273.

Long-term effects on speech of chronic cerebellar stimulation in cerebral palsy. Virginia I. Wolfe, David L. Ratusnik & Richard D. Penn. August, 286-290.

Markedness of features in the articulatory substitutions of children. Margaret Stutts Toombs, Sadanand Singh & Mary Ellen Hayden. May, 184-191.

Palilalia: A descriptive study of pathological reiterative utterances, Leonard L. LaPointe & Jennifer Horner. February, 34-38.

Perception of iconicity in American Sign Language by hearing and deaf subjects. Penny L. Griffith, Jacques H. Robinson & John M. Panagos. November, 388-397.

Perception of spoken communication by elderly chronically ill patients in an institutional setting, Rosemary Lubinski, Eleanor B. Morrison & Seymour Rig-

rodski. November, 405-412.
Performance of children with normal and impaired oral language production on a set of auditory comprehension tests. Jean M. Rizzo & Irene M. Stephens. May, 150-159.
Phonological processes which characterize unintelligible and intelligible speech in early childhood. Barbara Williams Hodson & Elaine Pagel Paden. November, 369-373.
Pitres' neurological model of language mechanism in polyglot aphasics. Kurt Kratschmer. February, 110-112.
Progressive hearing loss in children: Hearing aids and other factors. Katherine Reilly, Elmer Owens, Dennis Uken, Adeline Clingal McClathie & Ronnie Clarke. August, 328-334.
Psychological considerations in vocal rehabilitation. Freidrich S. Brodnitz, February, 21-26.
Reflex modulation: A hearing test for the difficult-to-test. Levi Reiter, Cornelius P. Goetzinger & Steven E. Press. August, 262-266.
Regression to the mean in pretreatment measures of stuttering. Gavin Andrews & Robin Harvey. May, 204-207.
Reply to Bountress and Richards. Joan Cassandra Payne & Robert Jay Williams, Jr., November, 437-439.
Reply to M. C. Martin. Barry A. Freeman, Stephen S. Sinclair & Donald E. Riggs. May, 224.
Reply to Turnbaugh. Irving Shapiro. August, 336.
Reply to Weiner, J. G. Andrews. August, 335.
Response of an agrammatic patient to a syntax stimulation program for aphasia, Nancy Helm Estabrooks, Patricia M. Fitzpatrick & Barbara Barresi. November, 422-427.
Response to Andrews, Guitar, and Howie. Adeline Weiner. August, 335.
Response to Freeman, Sinclair and Riggs. M. C. Martin. May, 224.
Response to Gandour. Madeline Brand. May, 218-220.
Response to Gandour. Barbara B. Dreher. May, 217-218.
Response to Shapiro. Karen Turnbaugh. August, 336.
Selection of children with specific language deficits. Rachel E. Stark & Paula Tallal. May, 114-122.
Short- and long-term outcome in an intensive treatment program for adult stutterers, Pauline M. Howie, Susan Tanner & Gavin Andrews. February, 104-109.
Speech style modifications of language-impaired children. Marc E. Fey, Laurence B. Leonard & Kim A. Wilcox. February, 91-96.
Systematic sound preference as a characteristic of phonological disability. Frederick F. Weiner. August, 281-286.
Tennessee test of rhythm and intonation patterns. Kazunari J. M. Koike & Carl W. Asp. February, 81-86.
The cry characteristics of an infant who died of the sudden infant death syndrome. November, 359-363.
The effects of early middle ear pathology on auditory perception and academic achievement. Pauline J. Brandes & Diane Ehinger. August, 301-307.
The effect of context on verbal elicited imitation. Mary Hale Haniff & Gerald M. Siegel. February, 27-30.
The functions of immediate echolalia in autistic children. Barry Prizant & Judith F. Duchan. August, 241-249.
The middle ground in evaluating language programs, Patricia A. Prelock & John M. Panagos. November, 436-437.
The speech specitrographic display: Interpretation of visual patterns by hearing-impaired adults, Jean E. Maki, Marianne Streff Gustafson, John M. Conklin, & Brenda K. Humphrey-Whitehead. November, 379-387.
The S/Z ratio as an indicator of laryngeal pathology. Frances C. Eckel & Daniel R. Boone. May, 147-149.
The relationship between magnitude of hearing loss and acoustic reflex threshold levels. Shlomo Silman & Stanley A. Gelfand. August, 312-316.
The role of distinctive features in articulation errors. Sadanand Singh, Mary Ellen Hayden & Margaret Stutts Toombs. May, 174-183.
Transfer of verbal responses across instructional settings by autistic-type children. Jan Sheldon Handlemen. February, 69-76.
Treatment of phonological disability using the method of meaningful minimal contract: Two case studies. Frederick F. Weiner. February, 97-103.
Vocal tract control in Parkinson's disease: Phonetic feature analysis of misarticulations. Jeri A. Logemann & Hilda B. Fisher. November, 348-352.
